

**Research project or internship
(max 1550 words)**

1. Project Title

2. Objectives of the thesis/research article/internship

The description should be structured as follows:

a) Introduction and background

Describe your research topic, establish common ground – refer to relevant literature – place the study in a research field assuming the evaluating committee has not specific expertise in that field

b) The research question(s) and objectives

Define research questions and/or list of hypotheses – what to achieve/what knowledge to produce?

c) Methods

Briefly describe which methods will be used to address the research questions

d) Data and accessibility (if relevant)

Illustrate the data you will use to address the research questions (e.g. data source and waves) and describe their accessibility (e.g. primary data obtained through a survey, publicly available secondary data, secondary data available under formal request, etc.)

3. Choice of the partner institute

Motivate the choice of the partner institute and clarify why the research/internship period is crucial to address your thesis/article objectives (e.g. access to specific data, expertise of the partner institute/hosting supervisor in the research field of the project, etc)

4. Timeline

Describe what you plan to do and when you plan to do it (you can use a bullet point). Clarify the duration of the research period/internship abroad and when it is scheduled in the timeline.

5. List of references
