Teaching test not provided.
Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	Teaching activity: The role will be required to teach on course units of the PEMM-01/A Performing Arts subject area, in accordance with the national regulations for full professors and as needed to cover the programme catalogue, giving priority to the needs of the campus indicated in the call for applications and to the First cycle degree programme in Drama, Art and Music Studies (DAMS) and the Second cycle degree programme in Music and Theatre Studies. Scientific activity: The role will be required to carry out research in the areas that refer to the PEMM-01/A Performing Arts subject area. In particular, scientific and research activities will be carried out in accordance with the most recent trends in theatre studies, with a view to enhancing transdisciplinarity and intertwining art and historiography traditions with new broadcasting, production and reception methods as influenced by the evolutions in technology and media, among others.
Number of publications to be assessed	12
Assessment standards	
	Teaching activities
Lecturing	For the purposes of assessing teaching activities, consideration will be given to the volume and continuity of teaching activities relevant to the declaration for the Subject area to which the selection refers. Consideration will be given to the teaching activities carried out by the candidate in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle

	degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: <ul style="list-style-type: none"> a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research; c) participation as a speaker at congresses and conferences of international interest.
Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria: <ul style="list-style-type: none"> a) originality, innovative nature, methodological rigour and importance of the publisher of each publication; b) consistency of each publication with the declaration for the Subject area to which the selection refers; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works. The individual contribution of the candidate will be determined based on clear and explicit indications (number of pages, paragraphs and/or chapters) in each collaborative work. <p>The Committee will not use bibliometric indicators.</p>

	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

SUBJECT AREA: MEDS-04/A - Anatomical Pathology

Posts: 1 Place of employment: Bologna

Teaching test not provided.

Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	<p>Teaching activity: The candidate will be required to carry out teaching and tutoring activities in course units of the MEDS-04/A Anatomical Pathology subject area, in the single cycle degree programme in Medicine and Surgery, the single cycle degree programme in English in Medicine and Surgery, in degree programmes in the area of health, in specialisation schools, professional master's programmes, first cycle degree programmes, PhD programmes and post-graduate programmes.</p> <p>Scientific activity: The candidate will be required to carry out scientific activities relevant to the MEDS-04/A Anatomical Pathology subject area, as well as related clinical care activities, with specialist competencies in autopsy, histological, cytological, ultrastructural and molecular diagnostics, with proven ability to cooperate in national and international settings, and with a focus on clinical and experimental research in uropathology.</p>
Language skills in addition to Italian, if any	English
Number of publications to be assessed	12
Clinical care activities	Clinical care activities
Facility where clinical care activities will be performed	Local Health Authority of Bologna
Qualification required under the applicable agreement	<ul style="list-style-type: none">- Degree in Medicine and Surgery;- Specialisation degree in Anatomical Pathology and equivalent or similar qualifications;- Registration with the Board of Physicians, Surgeons and Orthodontists.

	<p>- Professors in health fields who held a tenured position as at 01/02/1998 are exempt from the requirement to hold a specialisation degree in the discipline they were already teaching as tenured professors on that date (Article 56, paragraph 2 of Presidential Decree 483 dated 10 December 1997).</p>
Assessment standards	
	Teaching activities
Lecturing	For the purposes of assessing teaching activities, consideration will be given to the volume and continuity of teaching activities relevant to the declaration for the Subject area to which the selection refers. Consideration will be given to the teaching activities carried out by the candidate in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: <ul style="list-style-type: none"> a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research.
Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria:

	<p>a) originality, innovative nature, methodological rigour and importance of the publisher of each publication;</p> <p>b) consistency of each publication with the declaration for the Subject area to which the selection refers;</p> <p>c) scientific importance of the journal in which each publication appears and its readership within the scientific community;</p> <p>d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined by giving greater consideration to the first, last or corresponding author in the list of authors.</p> <p>The Committee will also make use of one or more of the following bibliometric indicators, referring to the start date of the assessment:</p> <ol style="list-style-type: none"> 1) total number of citations; 2) average number of citations per publication; 3) total impact factor; 4) average impact factor per publication; 5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).
	<p>Service, institutional, organisational and third mission activities</p>
<p>Service, institutional, organisational and third mission activities</p>	<p>For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.</p>
	<p>Clinical care activities in the medical sector</p>
<p>Clinical care activities in the medical sector</p>	<p>The compatibility of the overall clinical care activities carried out by the candidate with the Subject area to which the selection refers will be taken into consideration. The duration, continuity, specificity and level of responsibility of the clinical care activities performed will be considered.</p>

SUBJECT AREA: IIND-04/A - Processing Technologies and Systems
Posts: 1 Place of employment: Forlì
Teaching test not provided.
Seminar provided.

<p>Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)</p>	<p>Teaching activity: Teaching activities will be carried out mostly in first cycle and second cycle degree programmes in mechanical engineering, engineering management and polymer composites, including qualifying vocational degree programmes, as well as include the tutoring of students for internships, dissertations and PhD theses. The successful candidate will be required to teach course units in English. Teaching activities will cover the following fundamental topics of the subject area: plastic behaviour of metals, plastic deformation processes of metals and light alloys, technologies for the production of polymer composite components, characterisation tests of metallic and composite materials for the process digital twin, numerical process simulation.</p> <p>Scientific activity: Research will be carried out in the areas of industrial engineering, with special focus on the analysis and optimisation of mass production processes, the use of light and ultra-light alloys for the automotive and industrial sectors, the analysis and optimisation of manufacturing processes for polymer composite materials for the automotive, marine and industrial sectors. The candidate will be required to coordinate research groups also with other subject areas, to apply for national and international funding grants, including by participating in conference organisation committees and international networks for the creation of partnerships. The themes of his or her scientific activity will cover the fundamental areas of processing of metallic materials and polymer composites, using both traditional and innovative technologies. In the area of metallic materials, the candidate will be required to conduct both experimental and numerical research in the processes of extrusion, rolling, moulding and</p>
---	---

	wire drawing with special focus on the manufacture of components with controlled mechanical and microstructural properties for the industrial sector, including the automotive sector also for electric mobility. In the area of polymer composite materials, the candidate will be required to carry out research in the field of technologies for the production of (virgin and recycled) carbon fibre and glass fibre components, with technologies ranging from the minimisation of production costs on small series to medium-large series production using innovative press processes. The required approach will have to cover the entire production cycle: from the characterisation of untreated raw material, to the analysis and optimisation of the production process (by means of experimental, numerical and industrial validation approaches), to the static and dynamic characterisation of the components produced.
Language skills in addition to Italian, if any	English
Number of publications to be assessed	15
	Seminar at the Department
Format of the seminar at the Department	The seminar will be held in Italian. The seminar will be held in person.
Assessment standards	
	Teaching activities
Lecturing	For the purposes of assessing teaching activities, consideration will be given to the volume and continuity of teaching activities relevant to the declaration for the Subject area to which the selection refers. Consideration will be given to the teaching activities carried out by the candidate in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects:

	<ul style="list-style-type: none"> a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research; c) participation as a speaker at congresses and conferences of international interest.
Overall scientific production	<p>Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.</p>
Scientific publications submitted for assessment	<p>The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria:</p> <ul style="list-style-type: none"> a) originality, innovative nature, methodological rigour and importance of the publisher of each publication; b) consistency of each publication with the declaration for the Subject area to which the selection refers; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works. The individual contribution of the candidate will be determined as follows: 1/Number of authors. <p>The Committee will also make use of one or more of the following bibliometric indicators, referring to the start date of the assessment:</p> <ul style="list-style-type: none"> 1) total number of citations; 2) average number of citations per publication; 3) total impact factor; 4) average impact factor per publication;

	5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).
	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

	Research and scientific publications
Research	<p>For the purposes of assessing research activities, qualitative standards will focus on the following aspects:</p> <ul style="list-style-type: none"> a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research; c) participation as a speaker at congresses and conferences of international interest.
Overall scientific production	<p>Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.</p>
Scientific publications submitted for assessment	<p>The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria:</p> <ul style="list-style-type: none"> a) originality, innovative nature, methodological rigour and importance of the publisher of each publication; b) consistency of each publication with the declaration for the Subject area to which the selection refers; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works. The individual contribution of the candidate will be determined based on an explicit indication of which parts of any collaborative works are attributable to each author. <p>The Committee will not use bibliometric indicators.</p>

	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

FICLIT - DEPARTMENT OF CLASSICAL PHILOLOGY AND ITALIAN STUDIES

REF. O18C1II2024/1916/R23

SUBJECT GROUP: 10/GLOT-01 - Glottology and Linguistics

SUBJECT AREA: GLOT-01/A - Glottology and Linguistics

Posts: 1 Place of employment: Bologna

Teaching test not provided.

Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	<p>Teaching activity: The professor will teach on first, second and third cycle degree programmes of the Department, in the subjects relevant to the declaration for the subject area to which the call for applications refers, and namely Glottology and Historical Linguistics. Supplementary teaching and student support activities may also be included.</p> <p>Scientific activity: The professor will carry out research relevant to the declaration for the subject area. In particular, the Department aims to select a scholar who is interested in both historical linguistics (specifically, formal theories of linguistic change at the syntactic and semantic levels of analysis, also from an interface perspective; reference to Latin and Greek will be appreciated in this area) and synchronic linguistics (with particular regard to syntax and, again, the interface between syntax and semantics).</p>
Language skills in addition to Italian, if any	English
Number of publications to be assessed	12
