REF. O18C1II2022/1494/R22

COMPETITION SECTOR: 03/C1 - ORGANIC CHEMISTRY

SUBJECT GROUP: CHIM/06 - ORGANIC CHEMISTRY

Posts: 1 Place of employment: Bologna

Teaching test not provided.

Seminar provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	Teaching activity: The successful candidate will carry out teaching activities in course units of the CHIM/06 subject group, in first-cycle and second-cycle degree programmes of both the Department of Chemistry and other University Departments, both in Italian and in English. Teaching subjects will cover both the basics and the advanced and specialist aspects of Organic Chemistry. In the latter case, sustainability and greenness of Organic Chemistry will have to be highlighted. Consideration will also be given to teaching in PhD programmes. The successful candidate will supervise the production of first-cycle and second-cycle degree dissertations and PhD research projects. Scientific activity: The successful candidate will be required to carry out intensive research work on the essential themes of Organic Chemistry indicated among those of the CHIM/06 subject group, also by emphasising interdisciplinary and transferable aspects. Special attention will be paid to the following themes: sustainability and greenness of Organic Chemistry in recent years, use of renewable sources of raw materials, reduction of the impacts of chemical processes and products on the environment and human health.
Number of publications to be assessed	Maximum number: 18
Assessment standards	
	Teaching activities
Lecturing	For the purposes of assessing prior teaching experience, consideration will be given to its volume and continuity, with particular reference to teaching activities carried out in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) ownership of patents; c) receipt of national and international awards and recognitions for research; d) participation as a speaker at congresses and conferences of international interest.

Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria: a) originality, innovative nature, methodological rigour and importance of each publication; b) consistency of each publication; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined as follows: first or last author, if not listed in random order, reference author, specific contribution mentioned in the publication. The Committee will also make use of one or more of the following bibliometric indicators, referring to the start date of the assessment: 1) total number of citations; 2) average number of citations per publication; 3) total impact factor; 4) average impact factor per publication; 5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).
	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.
	Seminar at the Department
Format of the seminar at the Department	The seminar will be held in Italian or in English at the candidate's choice. The seminar will be held in person.

CHIMIND - DEPARTMENT OF INDUSTRIAL CHEMISTRY "TOSO MONTANARI"

REF. O18C1II2022/1495/R22

COMPETITION SECTOR: 03/C2 - INDUSTRIAL CHEMISTRY

SUBJECT GROUP: CHIM/04 - INDUSTRIAL CHEMISTRY

Posts: 1 Place of employment: Bologna

Procedure with teaching test.

Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	Teaching activity: The candidate will be required to carry out teaching activities in course units of the CHIM/04 subject group, primarily in the degree programmes of the Department taught at the Bologna campus in the area of Industrial Chemistry, with reference in particular to the basics of industrial chemistry, sustainable chemical processes and technologies, catalysis and development of industrial
--	---

	<p>processes and formulations. To such end, prior teaching experience is required in lecturing, laboratory or assistance activities, consistently with the declaration for the Industrial Chemistry subject group.</p> <p>Scientific activity: The candidate will be required to contribute to the development of research in the area of Industrial Chemistry. Specifically, the candidate will possess skills in process development and in the synthesis, characterisation and development of innovative catalysts with particular reference to applications in the field of biomass exploitation, production and use of platform molecules, production of monomers and energy carriers, and reduction of climate-changing gases. The candidate will also possess skills in the catalytic conversion of renewable raw materials and in CO₂ reuse.</p>
Language skills in addition to Italian, if any	English
Number of publications to be assessed	Maximum number: 15
Assessment standards	
	Teaching activities
Lecturing	For the purposes of assessing prior teaching experience, consideration will be given to its volume and continuity, with particular reference to teaching activities carried out in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Teaching test
Format of the test	The teaching test will be carried out in Italian. The teaching test will be carried out in person. For further information, see the Call for Applications article about the Teaching test.
	Research and scientific publications
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) ownership of patents consistent with the CHIM04 subject group disciplines and the specific functions required; c) scientific responsibility for research projects awarded funding on the basis of competitive calls, as well as consistency of the activities with the CHIM04 subject group disciplines and the specific functions required; d) responsibility for scientific research and studies assigned by public or private institutions, as well as consistency of the activities with the CHIM04 subject group disciplines and the specific functions required.
Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when

	work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria: a) originality, innovative nature, methodological rigour and importance of each publication; b) consistency of each publication; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works. The candidate's individual contribution will be determined based on the scientific consistency of his or her publications with his or her curriculum vitae as submitted, supported by his or her indication as reference author or first author, and based on the overall profile of the candidate as derived from his or her scientific activities and production. The Committee will also make use of one or more of the following bibliometric indicators, referring to the start date of the assessment: 1) total number of citations; 2) average number of citations per publication; 3) total impact factor; 4) average impact factor per publication; 5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).
	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

DBC - DEPARTMENT OF CULTURAL HERITAGE
REF. O18C1I12022/1496/R22
COMPETITION SECTOR: 10/D2 - GREEK LANGUAGE AND LITERATURE
SUBJECT GROUP: L-FIL-LET/02 - GREEK LANGUAGE AND LITERATURE
Posts: 1 **Place of employment: Ravenna**
Teaching test not provided.
Seminar provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	Teaching activity: Teaching activities will focus both on the basics of the Greek language and literature, and on the wider context of the classical tradition and its translation into visual arts, literatures and the cultural memory, with reference in particular to the theatre of ancient Greece. Scientific activity: Scientific activities will mainly focus on the good fortune and persistence of Greek literature and its genres in contemporary culture, paying special attention to interdisciplinary exchanges and interactions with new technologies, in order to contribute to develop an epistemology of cultural heritage that focusses on the classical tradition, as well as to encourage the
--	---

	creation of research groups committed to the study and enhancement of cultural heritage. Specifically, within this general area of research, the focus will be on the study of the imperial authors' recovery of cultural models from the archaic and classical period.
Language skills in addition to Italian, if any	English
Number of publications to be assessed	Maximum number: 15
Assessment standards	
	Teaching activities
Lecturing	For the purposes of assessing prior teaching experience, consideration will be given to its volume and continuity, with particular reference to teaching activities carried out in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research; c) participation as a speaker at congresses and conferences of international interest.
Scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications	The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria: a) originality, innovative nature, methodological rigour and importance of each publication; b) consistency of each publication with the competition sector and the subject group to which the procedure refers; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined based on the presence of recognisable elements of authorship in the contribution. The Committee will only consider publications in which the candidate's role is evident. The Committee will not use bibliometric indicators.
	Service, institutional, organisational and third mission activities

Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.
	Seminar at the Department.
Format of the seminar at the Department	The seminar will be held in Italian. The seminar will be held in person.

DIBINEM - DEPARTMENT OF BIOMEDICAL AND NEUROMOTOR SCIENCES

REF. O18C1II2022/1497/R22

COMPETITION SECTOR: 05/H1 - HUMAN ANATOMY

SUBJECT GROUP: BIO/16 - HUMAN ANATOMY

Posts: 1 **Place of employment: Bologna**

Teaching test not provided.

Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	<p>Teaching activity: Human Anatomy course units in Medicine and Surgery degree programmes in Italian and in English; Human Anatomy course units in Medical Specialisation Schools; Human Anatomy teaching with a topographic, clinical and experimental approach to cadavers; anatomical dissection techniques.</p> <p>Scientific activity: coordination of analysis of signal transduction systems at a physiological and pathological level in in vitro and ex vivo models from patients and cadavers at the Signal Transduction Laboratory; cadaver preservation; coordination of research activities for teaching and scientific purposes at the Dissection Room of the Centre for Clinical Anatomy and Experimental and Molecular Surgery.</p> <p>Areas of activity:</p> <ol style="list-style-type: none"> 1. Analysis of the molecular significance of the localisation of the inositide-dependent signalling system under normal and pathological conditions, in the central nervous system and in differentiative systems; 2. Correlation between anatomical variants and the role of signal transduction systems. Molecular analysis (human cell lines and primary cultures) under both normal and pathological conditions (ADLD, Glioblastoma and rare diseases) in parallel with the identification of anatomical variants in the central nervous system; 3. Analysis and development of innovative cadaver-based teaching methods for students and trainees in Medicine degree programmes, Medical Specialisation Schools and Professional Training Programmes (e.g. creation of multimedia contents with augmented reality, use of creative and collaborative translational teaching methods).
Language skills in addition to Italian, if any	English
Number of publications to be assessed	Maximum number: 16
Assessment standards	

	Teaching activities

Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

DIBINEM - DEPARTMENT OF BIOMEDICAL AND NEUROMOTOR SCIENCES
REF. O18C1II2022/1500/R22
COMPETITION SECTOR: 06/F1 - ODONTOSTOMATOLOGICAL DISEASES
SUBJECT GROUP: MED/28 - ODONTOSTOMATOLOGICAL DISEASES
Posts: 1 **Place of employment: Bologna**
Teaching test not provided.
Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	<p>Teaching activity: Teaching in the area of conservative and restorative dentistry and prosthesis in the School of Dentistry and in the Dental Hygiene degree programme.</p> <p>Scientific activity: Research and coordination in conservative, restorative and prosthetic dentistry, with special focus on the analysis of the stability and longevity of direct and indirect adhesive restorations. In particular, specific skills will be required in laboratory techniques concerning the analysis of dental biomaterials for restoration purposes and their interaction with oral cavity tissues. In-depth knowledge of the use of dental materials for restoration purposes and of the methods to increase longevity of direct and indirect restorations over time will also be required.</p>
Number of publications to be assessed	Maximum number: 25
Assessment standards	
	Teaching activities
Lecturing	For the purposes of assessing prior teaching experience, consideration will be given to its volume and continuity, with particular reference to teaching activities carried out in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to

	activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research; c) participation as a speaker at congresses and conferences of international interest.
Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria: a) originality, innovative nature, methodological rigour and importance of each publication; b) consistency of each publication; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined based on whether or not the candidate's name occupies a prominent position (first, last and second name) in his or her scientific works. The Committee will also make use of one or more of the following bibliometric indicators, referring to the start date of the assessment: 1) total number of citations; 2) average number of citations per publication; 3) total impact factor; 4) average impact factor per publication; 5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).
	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

	<p>teaching experience will have to include teaching activities in Biochemistry and Food Science/Human Nutrition Science.</p> <p>Scientific activity: The successful candidate will take care of the aspects relating to the effects of production and processing technologies on the nutritional value of food and the preservation of a correct nutritional status; the assessment of bioaccessibility and bioavailability of proteins, carbohydrates and lipids; the functionality of nutrients and bioactive components of food at the level of cells, tissues and the human organism. The scientific activity will focus on the biochemical basis of good nutrition, also for the purpose of producing high-nutritional value food. In that context, the candidate will have to be able to manage independent research groups. He or she will have to give evidence of his or her participation in research projects, particularly at an international level, as coordinator or principal investigator, and in scientific collaborations with Italian and foreign groups.</p>
Language skills in addition to Italian, if any	English
Number of publications to be assessed	Maximum number: 18
Assessment standards	
	Teaching activities
Lecturing	For the purposes of assessing prior teaching experience, consideration will be given to its volume and continuity, with particular reference to teaching activities carried out in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications.
Research	<p>For the purposes of assessing research activities, qualitative standards will focus on the following aspects:</p> <p>a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals;</p> <p>b) receipt of national and international awards and recognitions for research;</p> <p>c) participation as a speaker at congresses and conferences of international interest.</p>
Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	<p>The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria:</p> <p>a) originality, innovative nature, methodological rigour and importance of each publication;</p> <p>b) consistency of each publication;</p> <p>c) scientific importance of the journal in which each publication appears and its readership within the scientific community;</p>

	<p>d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined by grouping his or her publications into 3 classes: a. first name, last name, corresponding author; b. second name; c. other position.</p> <p>The Committee will also make use of one or more of the following bibliometric indicators, referring to the start date of the assessment: 1) total number of citations; 2) average number of citations per publication; 3) total impact factor; 4) average impact factor per publication; 5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).</p>
	Service, institutional, organisational and third mission activities.
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

FILCOM - DEPARTMENT OF PHILOSOPHY AND COMMUNICATION STUDIES

REF. O18C1II2022/1525/R22

COMPETITION SECTOR: 11/C5 - HISTORY OF PHILOSOPHY

SUBJECT GROUP: M-FIL/06 - HISTORY OF PHILOSOPHY

Posts: 1 Place of employment: Bologna

Teaching test not provided.

Seminar provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	Teaching activity: The professor will teach course units in first-cycle and second-cycle degree programmes in philosophy, in both Italian and English, focussing on key aspects and figures of the history of philosophy, with reference in particular to the classics of modern philosophy. Special attention in this context will be paid to the key authors of the 17th century in Europe and Britain and the complex evolution of their debate in the contemporary theoretical, historical and critical discussion. Supplementary teaching and student support activities will also be included. Scientific activity: The professor will carry out historiographical research on major reconstructive, philological and exegetic issues in accordance with the requirements of the declaration for the subject group. Special attention in this context will be paid to the textual tradition of the modern philosophical canon, with reference in particular to European classics between the 17th and the 19th century and the connections between modern European philosophy and modern and contemporary Italian culture.
Language skills in addition to Italian, if any	English
Number of publications to be assessed	Maximum number: 12
Assessment standards	
	Teaching activities

Lecturing	For the purposes of assessing prior teaching experience, consideration will be given to its volume and continuity, with particular reference to teaching activities carried out in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications.
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research; c) participation as a speaker at congresses and conferences of international interest.
Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria: a) originality, innovative nature, methodological rigour and importance of each publication; b) consistency of each publication; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined as indicated in the relevant publication. The Committee will not use bibliometric indicators.
	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) national and international awards and recognitions for research activities.
Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria: a) originality, innovative nature, methodological rigour and importance of each publication; b) consistency of each publication; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined by the Committee based on the explicit and specific indication of the candidate's individual contribution to the publication. The Committee will not use bibliometric indicators.
	Service, institutional, organisational and third mission activities.
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.
