Specific functions: Carry out research in the Analytical Chemistry subject area with regard in particular to the development of methodologies of interest in the environmental, advanced materials and cosmetics sectors. The successful candidate will be required to teach course units in the subject group and competition sector on the degree programmes for which the Department is responsible and/or to which it contributes.

Maximum number of eligible publications: 18

Assessment standards:

Teaching activities:
Consideration will be given to the volume and continuity of the activities carried out, with particular reference to course units and modules for which responsibility was taken.

Supplementary teaching and student service activities:
Consideration will be given to the supervision of first and second-cycle dissertations and PhD theses for which the candidate was the principal supervisor, as well as the conduct of seminars, case studies and the tutoring of students.

Research and scientific publications:

Research activities:
The following will be assessed:
a) organisation, management and coordination of national and international research centres, or participation therein, and other research activities such as the management of, or participation in, the editorial committees of journals;
b) ownership of patents;
c) national and international awards and recognitions for research activities.

Scientific production:
Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when research activities were involuntarily suspended and other periods of leave or stand-by established by current laws, excluding those allowed for study purposes.

Scientific publications:
Consideration will be given to:
a) originality, innovative nature, methodological rigour and importance of each publication;
b) consistency of each publication;
c) scientific importance of the journal or other outlet making the publication and its readership within the scientific community;
d) detailed analysis, applying criteria recognised by the relevant international scientific community, of the individual contribution made by the candidate to collaborative works, which will be determined based on the consistency of the publications with the curriculum submitted, supported if necessary, with the indication of the candidate as the lead author or author of reference, and as a proponent of scientific activity in a consolidated research group.
e) the Committee will also make use of one or more of the following indicators referring to the start date of the assessment:
1) total number of citations; 2) average number of citations per publication; 3) total “impact factor”; 4) average “impact factor” per publication; 5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).
### Institutional and organisational activities for the University
Total available points: 10

Consideration will be given to the volume and continuity of the activities carried out, with particular reference to management appointments and the commitment made to commissions and committees at significant public and private bodies or scientific and cultural organisations, or at the University and/or other Italian and foreign Universities.

### Total available points: 100
- Teaching activities: 40 points
- Research activities: 50 points
- Institutional and organisational activities for the University: 10 points

**DA - DEPARTMENT OF ARCHITECTURE**

Ref.: O18C1II2019/1042

**Competition Sector:** 08/F1 – URBAN AND REGIONAL PLANNING

**Subject Group (SSD):** ICAR/20 URBAN PLANNING AND ENGINEERING

**Place of employment:** Bologna

**Number of positions:** 1

### Specific functions
The professor will be required to coordinate research activities, including at the international level, in the ICAR 20 disciplinary area with specific regard to topics related to sustainable urban planning, climate change, energy saving and land consumption, urban and rural regeneration, sustainable mobility and tools for the environmental assessment of plans.

The teaching activities will involve the teaching of subjects in the ICAR/20 sector, with specific regard to Urban Engineering and Regional Planning, on first and second cycle degree programmes and will also be delivered in English.

### Language
English

### Maximum number of eligible publications
12

### Assessment standards

#### Teaching activities
Available points: 35

Consideration will be given to the volume and continuity of the activities carried out, with particular reference to course units and modules for which responsibility was taken.

#### Supplementary teaching and student service activities
Consideration will be given to the supervision of first and second-cycle dissertations and PhD theses for which the candidate was the principal supervisor, as well as the conduct of seminars, case studies and the tutoring of students.

### Research and scientific publications
Total available points: 50

#### Research activities
The following will be assessed:
- a) organisation, management and coordination of national and international research centres, or participation therein, and other research activities such as the management of, or participation in, the editorial committees of journals;
- c) receipt of national and international awards and recognitions for research activities.

#### Research activities
Participation as a speaker at international-level congresses and conferences will also be considered.

#### Scientific production
Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when research activities were involuntarily suspended and other periods of leave or stand-by established by current laws, excluding those allowed for study purposes.

#### Scientific publications
Consideration will be given to:
a) originality, innovative nature, methodological rigour and importance of each publication;
b) consistency of each publication;
c) scientific importance of the journal or other outlet making the publication and its readership within the scientific community;
d) detailed analysis, applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined based on its consistency with the rest of the scientific activity.

The committee will not make use of bibliometric indicators when assessing publications.

### Institutional and organisational activities for the University

**Available points:** 15

Consideration will be given to the volume and continuity of the activities carried out, with particular reference to management appointments and the commitment made to commissions and committees at significant public and private bodies or scientific and cultural organisations, or at the University and/or other Italian and foreign Universities.

**DISTAL - DEPARTMENT OF AGRICULTURAL AND FOOD SCIENCES**

Ref.: O18C11I2019/1058

**Competition Sector:** 07/E1 - AGRICULTURAL CHEMISTRY, AGRICULTURAL GENETICS AND PEDOLOGY

**Subject Group (SSD):** AGR/13 – AGRICULTURAL CHEMISTRY

**Place of employment:** Bologna

**Number of positions:** 1

**Specific teaching and scientific functions**

The Professor will carry out teaching activities in compliance with the University's instructions on the teaching commitment of full professors, with particular reference to topics relevant to the AGR/13 Subject Group. Specifically, the professor will work on chemical and biochemical aspects of the soil-plant system, soil fertility, plant nutrition, the quality and health of the soil-plant system and the use and recycling of biosolids. The scientific commitment must be focused on chemical and biochemical aspects of the soil-plant system, biogeochemical processes of the agro-forestry systems, the organic composition of the soil, improvement and restoration of soil quality and fertility for the sustainability of food and non-food production, pesticides and their residues, the use and recycling of biomass of agro-forestry, industrial and urban origin, and the conservation, protection and restoration of the agro-forestry environment.

</tr>
</tbody>
</table>

**QUALITY STANDARDS**

**TEACHING ACTIVITIES maximum available points: 40**

**Teaching activities**
The classroom teaching activities of the candidate in the AGR/13 subject group will be assessed, with particular regard to course units and modules for which the candidate took responsibility, in terms of overall consistency, continuity and effectiveness.

**Supplementary teaching and student service activities**
Consideration will be given to the supplementary teaching and student service activities related to the AGR/13 subject group: supervision of first and second-cycle dissertations and PhD theses for which the candidate was the principal supervisor, as well as the conduct of seminars, case studies and the tutoring of students.

**RESEARCH ACTIVITIES maximum available points: 45**

**Research activities**
The qualitative standard of scientific research activities will be assessed with reference to the following aspects:
- Organisation, management and coordination of national and international research centres, or participation therein, and other research activities such as the management of, or participation in, the editorial committees of journals;
- Ownership of patents;
- Receipt of national and international awards and recognitions for research activities.
- Participation as a speaker at international-level congresses and conferences will also be considered.

**Publications presented for the procedure**
Scientific publications will be assessed with reference to the following criteria:
- Originality, innovative nature, methodological rigour and importance of each publication;
- Consistency of each publication with the subject group;
- Scientific importance of the journal or other outlet making the publication and its readership within the scientific community.
- The individual contribution of the candidate to collaborative works, which will be determined based on criteria recognised by the relevant scientific community: a) first author b) senior author c) corresponding author.

The Committee will make use of one or more of the following bibliometric indicators when assessing publications:
- Total number of citations
- Average number of citations per publication
- Total “impact factor”
- Average “impact factor” per publication
- Combination of the preceding parameters in order to assess the impact of the candidate’s scientific production (Hirsch or similar index).

The candidate may present publications in Italian and English.

**INSTITUTIONAL ACTIVITIES maximum available points: 15**

**Institutional, organisational and service activities at the University**
Consideration will be given to the volume and continuity of the activities carried out, with particular reference to management appointments and the commitment made to boards and committees at significant public and private bodies or scientific and cultural organisations, or at the University and/or other Italian and foreign Universities. By way of example, the following may be taken into account:
- Departmental roles
  - Manager, assistant manager, deputy to the director, coordinator or chairman of formal department committees or working groups.
Teaching roles (Department, Faculty, School)
- Head Teacher or Dean, Office of the Vice Dean or Vice Dean, Degree Programme Coordinator, Degree Programme Quality Assurance Officer, Joint Committee Chairman, Director of first and second cycle degree programmes, Director of other university teaching initiatives.

University roles
- Member of the Academic Senate or Board of Governors; Vice Rector or Rector’s Delegate; participant in committees or working groups approved by the Rector, the Academic Senate or the Board of Governors.

DISTAL - DEPARTMENT OF AGRICULTURAL AND FOOD SCIENCES
Ref.: O18C1II2019/1059
Competition Sector: 07/A1 - AGRICULTURAL ECONOMICS AND APPRAISAL
Subject Group (SSD): AGR/01 - AGRICULTURAL ECONOMICS AND RURAL APPRAISAL
Place of employment: Bologna
Number of positions: 1

Specific functions
Teaching functions in the AGR/01 Agricultural Economics and Rural Appraisal subject group, including the economics and politics of agriculture, mountains, forests and agro-industry in relation to rural areas and their resources, agricultural enterprise and the technological means used, including agro-biotechnologies, economic aspects of planning and management of the land and rural environment, interaction of agricultural systems and economic development, rural and environmental appraisal. The teaching commitment is set out in the degree programmes of the Department.

The scientific and research commitment regards the economics, politics, management and appraisal of the production, transformation, distribution, marketing and consumption of products in the primary sector (agriculture, forestry and fishing), agro-biotechnologies and their relationship with other components of the socioeconomic and environmental system and economic aspects related to environmental impact assessment.

Language
ENGLISH

Maximum number of eligible publications
12

Assessment standards

Teaching activities
Available points: 35

Teaching activities
Consideration will be given to the volume and continuity of the activities carried out related to the AGR/01 subject group, with particular regard to course units and modules for which the candidate took responsibility, subject to their consistency with the AGR/01 subject discipline.

Supplementary teaching and student service activities
Consideration will be given to supplementary learning activities related to the supervision of first and second-cycle dissertations (or those of specialist degrees or degrees pertaining to the old degree system) and PhD theses, the conduct of seminars, case studies and the tutoring of students.

Research and scientific publications
Available points: 50

Research activities
The following will be assessed:
### Research activities
Participation as a speaker at international-level congresses and conferences relevant to the AGR/01 sector will also be considered.

### Scientific production
Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when research activities were involuntarily suspended and other periods of leave or stand-by established by current laws, excluding those allowed for study purposes.

### Scientific publications

<table>
<thead>
<tr>
<th>The Assessment Criteria for the Scientific Publications are predetermined by the regulations and will refer to the following aspects:</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Originality, innovative nature, methodological rigour and importance of each publication</td>
</tr>
<tr>
<td>b) Consistency of each publication with the subject group</td>
</tr>
<tr>
<td>c) Scientific importance of the journal or other outlet making the publication and its readership within the scientific community</td>
</tr>
<tr>
<td>d) The individual contribution of the candidate to collaborative works will be determined as follows:</td>
</tr>
<tr>
<td>1. The declaration of the authors based on that reported in the publication;</td>
</tr>
<tr>
<td>2. Alternatively, any declarations in lieu of the above, drafted in accordance with art. 47 of Presidential Decree 445 dated 28 December 2000 and included in the documentation attached to the application of each candidate;</td>
</tr>
<tr>
<td>3. Alternatively to the above, the role of the candidate as “first author” or “corresponding author” will be considered.</td>
</tr>
</tbody>
</table>

In assessing the publications, the Committee may make use of one or more bibliometric indicators which will refer to the start date of the assessment. The candidate may present publications in Italian and English.

### Institutional and organisational activities for the University
Available points: 15

Consideration will be given to the consistency of the activities carried out, with particular regard to management appointments and the commitment made to boards and committees at significant public and private bodies or scientific and cultural organisations, or at the University and/or other Italian and foreign Universities, determined in relation to type and duration.

Assessment standards

Teaching activities
Available points: 30

Teaching activities
Consideration will be given to the volume and continuity of the activities carried out, with particular reference to course units and modules for which responsibility was taken.

Supplementary teaching and student service activities
Consideration will be given to the supervision of first and second-cycle dissertations and PhD theses for which the candidate was the principal supervisor, as well as the conduct of seminars, case studies and the tutoring of students.

Research and scientific publications
Available points: 55

Research activities
The following will be assessed:
- organisation, management and coordination of national and international research centres, or participation therein, and other research activities such as the management of, or participation in, the editorial committees of journals;
- ownership of patents;
- receipt of national and international awards and recognitions for research activities.

Scientific production
Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when research activities were involuntarily suspended and other periods of leave or stand-by established by current laws, excluding those allowed for study purposes.
The Commission will make use of the following bibliometric indicators when assessing overall scientific production:
- total impact factor;
- Hirsch index (H-index).

Scientific publications
Consideration will be given to:
- originality, innovative nature, methodological rigour and importance of each publication;
- consistency of each publication with the CHIM/08 subject group;
- scientific importance of the journal or other outlet making the publication and its readership within the scientific community;
- detailed analysis, applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined as follows:
  - perfect score for all work where the candidate appears as the first/last name or corresponding author.

Scientific publications
The Committee will make use of one or more of the following bibliometric indicators, referring to the start date of the assessment:
1) total number of citations; 2) number of citations per publication; 3) total “impact factor”; 4) “impact factor” per publication; 5) combination of the preceding parameters in order to assess the impact of the candidate's scientific publications (Hirsch or similar index).

Institutional and organisational activities for the University
Available points: 15

Consideration will be given to the volume and continuity of the activities carried out, with particular reference to management appointments and the commitment made to boards and committees at significant public and private bodies or scientific and cultural organisations, or at the University and/or other Italian and foreign Universities.

By way of example, the following may be taken into account:
The Committee will take into consideration the following institutional or organisational roles performed for the University:
- Vice Rector or Rector’s Delegate;
- Member of the Academic Senate or the Board of Governors
- Chairman or member of a University Committee;
- Head of Department, Degree Programme Director;
- Member of a Department Committee or Joint School/Department Committee.

FILCOM - DEPARTMENT OF PHILOSOPHY AND COMMUNICATION STUDIES
Ref.: O18C1I12019/1064
Competition Sector: 11/C2 – LOGIC, HISTORY AND PHILOSOPHY OF SCIENCE
Subject Group (SSD): M-STO/05 – HISTORY OF SCIENCE AND TECHNOLOGY
Place of employment: Bologna
Number of positions: 1

Max. No. Publications 12

Language
The Committee will assess the English language skills of the candidates based on their teaching and academic qualifications.

Specific teaching and scientific functions
The Department will expect the successful candidate to carry out teaching and research activities in the History of Science discipline as envisaged in the subject group declaration.
The teaching commitment is aimed at teaching the History of Science and its relationship with other disciplines in the first and second cycle degree programmes.
The teaching commitment must relate to the subject group in question, with a particular focus on the ancient and medieval origins of science and technology.

QUALITY STANDARDS

TEACHING ACTIVITIES maximum points: 30

Teaching activities
For assessment purposes, consideration will be given to the volume and continuity of the course units and modules for which responsibility was taken in the last 5 academic years. Teaching activities performed abroad will also be taken into account.

Supplementary teaching and student service activities
Consideration will be given to the supervision of first and second-cycle dissertations and PhD theses for which the candidate was the principal supervisor, as well as the conduct of seminars, case studies and the tutoring of students.

RESEARCH ACTIVITIES max points 60

Research activities
The assessment will consider:
- Roles with responsibility (organisation, management and coordination) in
- Participation in national or international research centres or projects.
- Receipt of national and international awards and recognitions for research activities.
- Management of or participation in the editorial committees of journals and scientific committees of organisations, academies and scientific associations at national and international levels.
- Participation as a speaker at congresses and conferences of international interest.

The overall volume, intensity and continuity of the scientific production of candidates will be taken into consideration.
