Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	<p>Teaching activity: The role will involve teaching course units of the GSPS-03/A History of Political Thought subject group, in accordance with national regulations for full professors, and as needed to cover the programme catalogue. Priority will be given to the needs of the campus indicated in the call for applications and to the specific topics of the first-cycle degree programme in Drama, Art and Music Studies (DAMS) and the two-year Master's degree programme in Information, Cultures and Media Organization</p> <p>Scientific activity: The role will also involve conducting research in areas related to subject group GSPS-03/A - History of Political Thought. In particular, scientific and research activities must align with the latest developments in the study of modern and contemporary political concepts. Activities should focus on the relationship between the social sciences and modern political thought, and the impact of new technologies on contemporary political forms.</p>
Number of publications to be assessed	15 Languages of presentation of publications: Italian, English and German
Assessment standards	
	Teaching
Lecturing	For the purposes of assessing teaching activities, consideration will be given to the volume and continuity of teaching activities relevant to the declaration for the Subject Group to which the selection refers. Consideration will be given to the teaching activities carried out by the candidate in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle

	degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	<p>For the purposes of assessing research activities, qualitative standards will focus on the following aspects:</p> <ul style="list-style-type: none"> a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research; c) participation as a speaker at congresses and conferences of international interest.
Overall scientific production	<p>Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.</p>
Scientific publications submitted for assessment	<p>The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria:</p> <ul style="list-style-type: none"> a) originality, innovative nature, methodological rigour and importance of the publisher of each publication; b) consistency of each publication with the declaration for the Subject Group to which the selection refers; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works. The candidate's individual contribution will be determined as follows: in the case of publications by several authors, the individual contribution of each author must be specified. <p>The Committee will not use bibliometric indicators.</p>

	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

DBC - DEPARTMENT OF CULTURAL HERITAGE

REF. O18C1I2025/1953/R23

SUBJECT AREA: 11/HIST-04 - Book and Archive Studies, Historical-religious Sciences

SUBJECT GROUP: HIST-04/C - Library Management

Posts: 1 Place of employment: Ravenna

Teaching test not provided.

Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	<p>Teaching activity: The lecturer will teach the second level course LM/5 on bibliography and librarianship (library management, the history of bibliography and bibliology, the history of libraries, information theory and documentary research). He/she will support the management of the LM/5 degree course and coordinate and support the Quality Assurance Committee and the teaching of the PhD Course in Cultural and Environmental Heritage, offered by the DBC, and the PhD Course in Cultural Heritage in the Digital Ecosystem offered by the FICLIT.</p> <p>Scientific activity: The role is required to carry out research in the field of bibliography and librarianship from historical and methodological perspectives. In particular, he or she will conduct research into the history of libraries and bibliography, from the beginning of the modern era to the present day. Particular attention will be given to sources, personal collections, personal and authorial archives and religious institutions, and socio-cultural phenomena that influence the formation of libraries as cultural spaces. Modern technologies will be used to develop an innovative methodology. He/she will also organise cultural activities and promote conferences, seminars and third mission activities at the Ravenna Campus.</p>
Number of publications to be assessed	25 Languages of presentation of publications: Italian, English, French, German and Spanish
Assessment standards	
	Teaching
Lecturing	For the purposes of assessing teaching activities, consideration will be given to the volume and continuity of teaching activities relevant to the declaration for the Subject Group to which the

	selection refers. Consideration will be given to the teaching activities carried out by the candidate in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: <ul style="list-style-type: none"> a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research; c) participation as a speaker at congresses and conferences of international interest.
Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria: <ul style="list-style-type: none"> a) originality, innovative nature, methodological rigour and importance of the publisher of each publication; b) consistency of each publication with the declaration for the Subject Group to which the selection refers; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works. The individual

	contribution of the candidate will be determined as follows: a clear indication of the parts for which they are responsible. The Committee will not use bibliometric indicators.
	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

	5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).
	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

DICAM - DEPARTMENT OF CIVIL, CHEMICAL, ENVIRONMENTAL AND MATERIALS ENGINEERING
REF. O18C1I2025/1957/R23
SUBJECT AREA: 03/CHEM-07 - Medicinal, Toxicological, Nutraceutical-food, Fermentation and Health and Wellbeing Products Chemistry
SUBJECT GROUP: CHEM-07/C - Chemistry and Biotechnology of Fermentations
Posts: 1 Place of employment: Bologna
Teaching test not provided.
Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	Teaching activity: The successful candidate will carry out teaching activities mainly within courses offered by DICAM relating to subject group CHEM-07/C. Scientific activity: The successful candidate will conduct research aligned with the CHEM-07/C subject group and DICAM's research and innovation priorities. This will involve studying the biotransformation and biodegradation of polluting chemicals, polymeric materials, and biomaterials. The candidate will also explore the use microorganisms and enzymes to develop and optimise biotechnological processes for the remediation and ecological regeneration of contaminated or degraded soils, sediments and waters. Funding will be obtained primarily through competitive national and European opportunities.
Language skills in addition to Italian, if any	English
Number of publications to be assessed	15
Assessment standards	
	Teaching

Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

DIFA - DEPARTMENT OF PHYSICS AND ASTRONOMY "AUGUSTO RIGHI"

REF. O18C1I2025/1959/R23

SUBJECT AREA: 02/PHYS-01 - Experimental Physics of Fundamental Interactions and Applications

SUBJECT GROUP: PHYS-01/A - Experimental Physics of Fundamental Interactions and Applications

Posts: 1 Place of employment: Bologna

Teaching test not provided.

Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	Teaching activity: Teaching tasks will be carried out primarily within DIFA degree programmes, in subject group PHYS-01/A (formerly FIS/01). Scientific activity: The successful candidate will specialise in nuclear and subnuclear physics involving very high energy heavy ions, particularly with regard to developing innovative detectors for future experiments at the LHC and next-generation colliders.
Language skills in addition to Italian, if any	English
Number of publications to be assessed	12
Assessment standards	
	Teaching
Lecturing	For the purposes of assessing teaching activities, consideration will be given to the volume and continuity of teaching activities relevant to the declaration for the Subject Group to which the selection refers. Consideration will be given to the teaching activities carried out by the candidate in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	For the purposes of assessing research activities, qualitative standards will focus on the following aspects: a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such

	<p>as direction of, or participation in, editorial boards of journals;</p> <p>b) receipt of national and international awards and recognitions for research.</p>
Overall scientific production	<p>Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.</p>
Scientific publications submitted for assessment	<p>The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria:</p> <ul style="list-style-type: none">a) originality, innovative nature, methodological rigour and importance of the publisher of each publication;b) consistency of each publication with the declaration for the Subject Group to which the selection refers;c) scientific importance of the journal in which each publication appears and its readership within the scientific community;d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works. The candidate's individual contribution will be determined as follows: responsibility for the scientific activity of the publication, order of names and if applicable, corresponding author and self-declarations. This will be evidenced by the documentation attached to their application or curriculum vitae. <p>The Committee will also make use of one or more of the following bibliometric indicators, referring to the start date of the assessment:</p> <ul style="list-style-type: none">1) total number of citations;2) average number of citations per publication;3) total impact factor;4) average impact factor per publication;

	5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).
	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.

DIMEC - DEPARTMENT OF MEDICAL AND SURGICAL SCIENCES

REF. O18C1I2025/1961/R23

SUBJECT AREA: 06/MEDS-10 - Gastroenterology, Infectious Diseases and Skin Diseases

SUBJECT GROUP: MEDS-10/B - Infectious Diseases

Posts: 1 Place of employment: Bologna

Teaching test not provided.

Seminar not provided.

Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out)	<p>Teaching activity: The successful candidate will ensure the coordination of all teaching activities within the competence of the subject group, personally carrying out the teaching activities foreseen within the Medicine and Surgery degree programme in Italian or the Medicine and Surgery degree programme in English.</p> <p>The candidate will also be required to teach courses related to the subject group in the Specialisation School of Infectious Diseases as well as in other areas where specific subject group teaching is planned. This will be coordinated with the directors of the relevant schools.</p> <p>Scientific activity: The successful candidate will coordinate and verify the appropriateness of the various scientific activities on the subject group research platform.</p> <p>They will conduct clinical research into infectious risk in the most vulnerable patients. This will involve quantifying, preventing and managing such risks in patients undergoing solid organ transplants as well as in onco-haematological patients who have or have not undergone stem cell transplants or therapy with engineered lymphocytes.</p> <p>Given the broad scope of infectious diseases, the successful candidate must have the necessary methodological and clinical expertise to oversee clinical research in related areas such as bloodstream infections, pneumonia, SARS-CoV-2 infections and targeted antimicrobial therapy.</p>
Language skills in addition to Italian, if any	English
Number of publications to be assessed	12
Clinical care activities	

Facility where clinical care activities will be performed	IRCCS University Hospital of Bologna - Policlinico Sant'Orsola
Qualification required under the applicable agreement	<ul style="list-style-type: none"> - Degree in Medicine and Surgery - Specialisation degree in Infectious and Tropical Diseases or Internal Medicine and equivalent or similar qualifications; - Registration with the: Board of Physicians, Surgeons and Orthodontists; - Professors in health fields who held a tenured position as at 01/02/1998 are exempt from the requirement to hold a specialisation degree in the discipline they were already teaching as tenured professors on that date (Article 56, paragraph 2 of Presidential Decree no. 483 dated 10/12/1997)
Assessment standards	
	Teaching
Lecturing	For the purposes of assessing teaching activities, consideration will be given to the volume and continuity of teaching activities relevant to the declaration for the Subject Group to which the selection refers. Consideration will be given to the teaching activities carried out by the candidate in the last 10 years.
Supplementary teaching and student support activities	For the purposes of assessing supplementary teaching and student support activities, consideration will be given to activities such as supervision of first-cycle and second-cycle degree dissertations and PhD theses, the conduct of seminars, practical work and tutoring of students.
	Research and scientific publications
Research	<p>For the purposes of assessing research activities, qualitative standards will focus on the following aspects:</p> <ul style="list-style-type: none"> a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research; c) participation as a speaker at congresses and conferences of international interest.
Overall scientific production	Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity

	over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes.
Scientific publications submitted for assessment	<p>The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria:</p> <ul style="list-style-type: none">a) originality, innovative nature, methodological rigour and importance of the publisher of each publication;b) consistency of each publication with the declaration for the Subject Group to which the selection refers;c) scientific importance of the journal in which each publication appears and its readership within the scientific community;d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works. The individual contribution of the candidate will be determined as follows:<ul style="list-style-type: none">- original works will be prioritised, followed by reviews, expert opinions, editorials and participation in guideline steering committees, etc.- priority will be given to original works in which the candidate is listed as the first, second or last author- priority will also be given to studies involving multiple research groups, provided that the candidate's role is clearly that of coordinator. <p>The Committee will also make use of one or more of the following bibliometric indicators, referring to the start date of the assessment:</p> <ul style="list-style-type: none">1) total number of citations;2) average number of citations per publication;3) total impact factor;4) average impact factor per publication;5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index).

	Service, institutional, organisational and third mission activities
Service, institutional, organisational and third mission activities	For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed.
	Clinical care activities in the medical sector
Clinical care activities in the medical sector	The compatibility of the overall clinical care activities carried out by the candidate with the Subject Group to which the selection refers will be taken into consideration. The duration, continuity, specificity and level of responsibility of the clinical care activities performed will be considered.

DIMEC - DEPARTMENT OF MEDICAL AND SURGICAL SCIENCES

REF. O18C1I2025/1962/R23
