| Research | For the purposes of assessing research activities, qualitative standards will focus on the following aspects: a) organisation, management and coordination of national and international research centres or groups, or participation therein, and other research activities such as direction of, or participation in, editorial boards of journals; b) receipt of national and international awards and recognitions for research activities. |
| Overall scientific production | Consideration will be given to the overall weight of the candidate's scientific production and its intensity and continuity over time, excluding any adequately documented periods when work was suspended and other mandatory or long-term leaves established by current laws, other than those allowed for study purposes. |
| Scientific publications submitted for assessment | The scientific publications submitted for detailed assessment will be assessed with reference to the following criteria: a) originality, innovative nature, methodological rigour and importance of each publication; b) consistency of each publication; c) scientific importance of the journal in which each publication appears and its readership within the scientific community; d) analytical assessment, also by applying criteria recognised by the relevant international scientific community, of the individual contribution of the candidate to collaborative works, which will be determined by giving consideration to the following as leading positions in the list of authors: first or co-first, last or co-last, corresponding or co-corresponding author. The Committee will also make use of one or more of the following bibliometric indicators, referring to the start date of the assessment: 1) total number of citations; 2) average number of citations per publication; 3) total impact factor; 4) average impact factor per publication; 5) combination of the preceding parameters in order to assess the impact of the candidate's scientific productivity (Hirsch or similar index). |
| | Service, institutional, organisational and third mission activities |
| Service, institutional, organisational and third mission activities | For the purposes of assessing service, institutional, organisational and third mission activities at Universities and private and public research institutions, to the extent relevant to the role, consideration will be given to their volume, duration and continuity, as well as to the level of responsibility of the functions performed. |
| | Clinical care activities in the medical sector |
| Clinical care activities in the medical sector | The compatibility of the overall clinical care activities carried out by the candidate with the subject group to which the selection refers will be taken into consideration. The duration, continuity, |

| Specific functions (type of teaching and scientific activity that the successful candidate will be required to carry out) | <p>The successful candidate's specific functions will be defined in agreement with the declaration for the MED/43 subject group.</p> <p>Teaching activity: Legal medicine with special regard to forensic toxicology, its theoretical aspects and practical applications. Teaching will focus in particular on the legislation on narcotic drugs, the use and interpretation of substance use/abuse markers, the phenomenology of abuse and addiction in its social implications, analytical chemistry, analysis and interpretation of results.</p> <p>Scientific activity: International publications in scholarly journals according to Web of Science in the areas of analytical chemistry, forensic toxicology and proteomics. In particular, the successful candidate will be required to carry out scientific activity as follows: validation of analytical-toxicological methods using capillary electrophoresis/chromatography techniques coupled with mass spectrometry on living and non-living samples, including traditional (blood and urine) and alternative (saliva and hair) matrices. Studies on alcohol and drug use/abuse in peculiar populations (e.g. individuals tested for fitness to drive, convicts). Medicine-taking and tampering with medicine for abuse purposes. Development, analytical validation and population studies in the area of drug facilitated sexual assault (DFSA). Thanatochemistry studies. Validation and study of exposure to environmental toxins, with reference in particular to perfluoroalkyl substances (PFASs). Doping and adulteration of dietary supplements in athletes undergoing competitive sports tests.</p> |
| Language skills in addition to Italian, if any | English |
| Number of publications to be assessed | 12 |
| Clinical care activities | Not provided (the successful candidate will exclusively carry out research on forensic toxicology). |
