- ✓ Hands-On Activities
- ✓ Collaborative Online Case Reports

3 ECTS
53 study hours

Content guarantors

PharmDr. Jitka Rychlíčková, Ph.D., BCPS
PharmDr. Lenka Součková, Ph.D.

About our TBL lessons...

The Summer school will be based on team-based learning (TBL) focused on a specific drug category or treatment of a condition. Each TBL lesson is preceded by an individual pre-class reading. The TBL lesson is then initiated by checking on understanding the information, first in an individual and then in a team-based rapid assessment test. This is followed by a virtual patient case report and a discussion of the individual topics. You can look forward to topics such as clinical pharmacology of antithrombotics, pain management, or principles of drug dosing in patients with renal or hepatic insufficiency. And much more.
